

## Education

**University of Reading,  
BA Graphic Communication**  
SEP. 2016 – JUN. 2019

I graduated with a First Class Honours from the UK's leading typography research department.

During my time there I set up and ran the Department's official Instagram account, directing a small team to help me. The team was also responsible for promoting a series of special talks given each week by internal and external speakers. I was also responsible for branding the degree show for the Art department, and helped organise my own year's show.

**The Minster School, Southwell**  
SEP. 2009 – JUN. 2016

ABC at A-Level in Graphic Products, Computing, and Mathematics respectively.

## Interests

I have an overwhelming love for all aspects of indie and electronic music, regularly attending gigs and club nights, DJing, and playing the drums. I also deeply enjoy shooting photographs on 35mm film.

## Technical skills

- Adobe Photoshop, Lightroom, Illustrator, InDesign, After Effects, Premiere Pro
- Sketch, Figma
- HTML, CSS, Sass
- JavaScript, jQuery, React
- WordPress theme development, Jekyll, Eleventy
- Ableton Live

## Experience

**E1 London, Graphic designer**  
JUN. 2019 – PRESENT

Reporting to the Head of Marketing, I serve as the in-house designer for east London-based nightclub E1. During my time there I have transformed and developed the look of the venue with a visual identity that balances the commercial and the forward-thinking.

Projects and responsibilities have included:

- static and animated flyers for internal shows
- video editing to advertise shows on social media
- monthly and seasonal campaign design and concepts
- venue photo editing for press and editorial purposes
- graphic and video based social/editorial content e.g. Instagram stories
- assisting the marketing team with the production of email newsletters, playlists and other editorial content

## Freelance

2012 – PRESENT

I have been commissioning graphic design and web development work since I was a teenager for clients of a variety of backgrounds, including music venues, fine artists, lawyers, game developers, clothing shops, religious institutions, and more.

Projects have included:

- designing and developing responsive websites from scratch using content management systems such as WordPress.org
- print products such as newsletters and flyers
- online graphics for e-commerce websites and social media pages
- product photograph editing
- HTML email newsletters
